

AI Full Stack Engineer | Generative AI Developer

AI Full Stack Engineer specialising in building intelligent applications using modern web technologies and Large Language Models (LLMs). Experienced in developing AI-powered products end-to-end, from frontend interfaces and backend APIs to retrieval systems, embeddings, and LLM integrations. Skilled in React, Node.js, Next.js, Python, MongoDB, RAG architectures, and AI-assisted workflows. Passionate about creating scalable AI solutions that solve real-world problems.

Experience

AI & ML Developer | ShadowFox (March 2025)

- Designed and optimised machine learning models for image tagging, achieving **92% accuracy** on a dataset of **5,000+ images**, improving classification reliability
- Performed data preprocessing, feature engineering, and cross-validation on **10K+ data samples**, improving model generalisation by **20%**
- Evaluated model performance using statistical metrics, reducing data processing time by **30%** through optimised pipeline design
- Contributed to building scalable ML workflows handling **multiple experimental pipelines**, improving training efficiency and reproducibility by **25%**

Associate Technical Developer | CITS (Sep 2025 – Dec 2025)

- Conducted a **2-week Flutter bootcamp for 250+ students**, improving post-training assessment scores by **40%**
 - Led a **4-member full-stack development team** to build a Learning Management System (LMS) website serving **200+ users**
 - Contributed to frontend development, ensuring **cross-platform compatibility across web and mobile devices**
 - Presented **3+ technical project demos**, effectively communicating system design, workflows, and outcomes to peers and mentors
-

Projects

AI Career Agent

- Developed an AI-powered job and internship automation platform that streamlines the application process across multiple job portals.
- Built intelligent workflows for job matching, resume optimisation, skill-gap analysis, and personalised application recommendations.
- Designed AI-assisted resume and cover letter generation using LLM integration and prompt engineering techniques.
- Implemented application tracking and automated workflow architecture supporting scalable multi-platform job search operations.

AI Butler Portfolio

- Developed an interactive AI-powered portfolio experience featuring a virtual Butler that guides visitors through projects, skills, and professional achievements.
- Designed conversational AI workflows enabling natural language interaction and personalised portfolio exploration.
- Built a modern full-stack architecture combining responsive UI design with intelligent assistant capabilities.
- Created an immersive user experience that transforms a traditional portfolio into an AI-driven digital showcase.

Adaptive Learning AI (Zyvora)

- Developed an AI-based adaptive learning system analysing **1,000+ user interactions** to personalise content delivery.
- Designed recommendation-style workflows, improving user engagement by **45%**.
- Integrated speech-to-text and text-to-speech modules supporting **multimodal learning interaction flow**.
- Built a scalable AI-driven architecture capable of handling **real-time user input processing**.

AI Document Q&A System

- Built a document-based question answering system using embeddings and RAG concepts, processing **large text datasets**.
 - Designed a retrieval pipeline improving response relevance and accuracy by **~20–25%**.
 - Implemented a prompt-based generation system producing structured outputs for improved response consistency.
 - Reduced manual search time for document queries by **~60%** through an automated retrieval system.
-

Education

CMR Engineering College | CGPA - 8.1
TMR-JC Balanagar Boys-1 | CGPA - 8.9
TMREIS Balanagar Boys-1 | CGPA - 10

Bachelor of Technology (CSE- AI&ML) | 2022 – 2026
Intermediate (MPC) | 2020 - 2022
Secondary School Certificate (SCC) | 2016 - 2020

Technical Skills

Programming: Python, Java, C++, JavaScript, SQL

Frontend: React.js, HTML5, Tailwind, JavaScript

Backend: Node.js, Express.js, REST APIs

AI & Machine Learning: Machine Learning, Data Preprocessing, Feature Engineering, Model Evaluation, Prompt Engineering, RAG, Embeddings, LLM Integration, Semantic Search

Databases: MongoDB, MySQL

LLM Tools: OpenAI API, Gemini API

Tools: Git, GitHub, Postman, Microsoft Office, Google Workspace
