

Experience

AI & ML Developer | ShadowFox (March 2025)

- Designed and optimised machine learning models for image tagging, achieving **92% accuracy** after testing **5+ architectures** and tuning **20+ hyperparameter combinations**.
- Performed data preprocessing and feature engineering on **10K+ image samples**, improving model generalisation and predictive reliability by **20%**.
- Evaluated model performance using precision, recall, and F1-score, accelerating the data analysis pipeline by **30%** and reducing manual validation effort by **40%**.

Associate Technical Developer | CITS (Sep 2025 – Dec 2025)

- Conducted a **2-week Flutter bootcamp** for **250+ students**, increasing average UI and architecture assessment scores by **40%** based on post-training evaluations.
- Led a **4-member full-stack team** to deliver an LMS website used by **200+ users**, improving page load speed by **35%** through optimised frontend architecture.
- Developed responsive Flutter UI components and ensured **100% cross-platform compatibility** across Android, iOS, and web, reducing UI-related bugs by **50%**.

Projects

Real-Time Web Chat Application (TEAM 😊)

- Built a real-time chat platform supporting **100+ concurrent users**, handling **1,000+ messages/day** with **zero message loss**.
- Integrated Socket.IO for bi-directional communication, reducing average message latency from **250ms to 150ms**.
- Implemented JWT authentication and bcrypt encryption, securing **500+ user accounts** and lowering authentication-related vulnerabilities by **90%**.

Learning Management System (LMS) Website

- Developed a full-stack LMS platform for **200+ students and instructors**, supporting course enrollment, progress tracking, and assignment management.
- Designed **15+ REST APIs** to connect frontend and backend, reducing average server response time by **25%** and improving system reliability.

Adaptive Learning AI (Zyvora)

- Designed an AI-powered learning assistant tested with **50+ students**, increasing engagement and session completion rates by **45%**.
- Implemented adaptive question generation using performance history, improving learning accuracy by **35%** across repeated sessions.
- Added speech-to-text and text-to-speech modules, improving accessibility for **30% non-visual learners** and reducing interaction time by **20%**.

Education

CMR Engineering College | Hyderabad, India

Bachelor of Technology (B. Tech) | 2022 – 2026 (Expected)

Skills

Programming: C++, Java, JavaScript, SQL

Frontend: React, TailwindCSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT

Databases: MySQL, MongoDB

AI/ML: Model Training, Feature Engineering, Cross-Validation

Tools: Git, GitHub, Postman

Declaration

I hereby declare that the above information is true to the best of my knowledge.
